ABOUT ME

A well-motivated developer, with over 3+ years' experience as full-stack developer. Successfully implemented wide range of projects from web services to large web platforms. Acted as a team leader and was involved in direct communication with end-client to propose obstacles resolution. Participated in the entire software delivery process of getting a software product to customers, from conceptualization, through development, and ending in the actual installation and launching it. Proactive, versatile, highly adaptable, answer finder, intellectually curious.

WORK EXPERIENCE

Expletech

2022 - 2024

Full stack developer - Full time

- Website for well-known Cinema with landing page and admin dashboard: Focused on creating a RESTful API with authentication, integrating AWS S3, a ticket purchasing service, deploying on AWS Elastic Beanstalk, and overseeing frontend development.

Technology stack: NextJS, Redux Toolkit, NestJS, TypeORM, PostgreSQL, TypeScript.

- E-commerce platform for client in Dubai, focused on groceries delivery from different shops located around the user, project included robust admin dashboard. Efforts were directed towards creating a RESTful API, integrating AWS S3, Stripe for payment processing, obtaining proper geolocation and collaborating with another overseas backend team.

Technology stack: ReactJS, Redux Toolkit, NestJS, TypeORM, PostgreSQL, TypeScript.

- Employees oriented social network, a platform which allows user to leave a reviews about employer, salaries and much more. Responsible for team and client communication, participating in development, being main obstacles resolver. Implemented chat, LinkedIn integration, notification system, CMS, and admin panel.

Technology stack: ReactJS, Redux Toolkit, NestJS, TypeORM, Socket.IO, PostgreSQL, TypeScript.

Okten
